PROJECTS

Property Rental Website
03/2026 – 06/2026
This project involves creating a **website using JavaScript,HTML,CSS for Front End and C# for BackEnd**.
The website handles booking, login, signup and all other functionalities of a proper property rental website.

Banking System
11/2025 – 02/2026
This project is a **Banking System application developed in Java using Object-Oriented Programming (OOP) principles**.The application includes a **JavaFX-based interface for login and interaction**.

School Database System
11/2025 – 01/2026
This project is a **Database Management Systems (DBMS) implementation and practice repository** that demonstrates the fundamental concepts of database design, data organization, and SQL-based data manipulation.The system illustrates how data can be **stored, organized, retrieved, and manipulated using SQL queries**

Property Rental System
03/2026 – 06/2026
This project involves **creating and designing a software system for Property Renting.** It contains everything from **activity diagrams, to sequence, use case tables and diagrams, class diagram, BPMN, IOD diagram and collaboration diagrams.**
